# Streamit Claudio

Business audio in control

THE BEST WAY TO MANAGE STREAMIT DEVICES

[STREAMIT.EU](https://streamit.eu)

## BUSINESS AUDIO IN CONTROL

## Streamit Claudio

*The powerful audio platform that lets you plan and manage music, commercials and announcements from one place.*

With Claudio you can manage all your Streamit Lisa players remotely from one computer. Our cloud-based software makes it very easy to be in control of the business audio in all your locations.

## Simplifying work and saving time

Your content managers can upload playlists, including audio content, ahead of time and leave it up to Claudio to serve the ones intended for any given day. In one go they can edit all content on all your locations. This makes managing content easy but also saves a lot of time.

#### Also get to know these Claudio benefits

Content managers can assign and remove playlists for a selection of players, see an overview of the players that are using specific playlists, and export the overviews. Claudio also lets you connect any number of Lisa players at your customers' locations to your online radio station, livestream, or file server. It's even possible to select up to 50 preset streams.

- Complete control over your business audio from one computer
- User-friendly store and forward functionalities
- Easy monitoring and control of all your Lisa players
- New players are simple to add with bulk registration
- Minimum configuration needed

### Thousands of Claudio users

Our main customers are business audio providers who deliver music to their customers including hotels, retail chains, restaurants and public radio stations. We also supply large hotel and restaurant groups directly. More than thousands Lisa players already use Claudio, and this number is growing each day.

### Cloud based secure audio streams

Since Claudio is cloud based, availability is extremely high: uptime has been above 99,95% for several years. And, being cloud based, it's also highly scalable, connecting to any number of Lisa players.

Operation is secure: all communication between Claudio and Lisa is initiated by Lisa to prevent internet security issues. Optional advanced monitoring features show all major system events for up to 30 days.

- Players can be organized in groups for access or management
- Full read-only access to your customers' players
- Temporarily deactivate players that are not in use to avoid charges
- Tags allow flexible grouping and filtering of Lisa players and are especially powerful when assigned to selections of players

## Three subscriptions

Claudio is subscription based. We have a suitable solution for every need. You can choose from three options: Basic, Extended and Ultimate. Discover which subscription suits you.

### Basic subscription

*The most affordable way to connect your own stream or public streams to your Lisa players.*

- Add stream lists to the players and view them.
- Group streams and add extra players to them.
- Players menu shows all the players with the key information, which platform they belong to, and which resources they use.
- Configure players, activate/deactivate them.
- Create new streams and assign them to the players.
- Download CSV files containing information on multiple players.

### Extended subscription

*It includes all the Basic features and adds monitoring and control. With the Extended subscription it's easy to troubleshoot the system if anything goes wrong.*

- Set the monitoring interval and get a color-coded overview of the health of all your players.
- For more control, you can zoom in and investigate the details of players for troubleshooting, and execute tasks for corrective measures using return commands.
- Tasks can be sent to a single player or a selection of players simultaneously.

## Ultimate subscription

*This is for customers who want maximum control over content storage and distribution. The ultimate subscription includes all the Basic en Extended features.*

- Upload content (music, ads, announcements, playlists) from your PC to Claudio, where your Lisa players can download them.
- See all the available Claudio playlists, assign them to your player or a group of players, or copy them to a new set.
- Plan announcements through the task scheduler.
- Deploy Store And Forward, so you can distribute audio content to a fleet of players. Music, ads, announcements, and playlists can all be downloaded and scheduled by the player.
- A calendar view of the results is made available.
- Schedule important messages to play at specific times, interrupting music when required.

## GET IN TOUCH

Get in touch with us if you have any questions about our subscriptions or if you would like a free demo.

We are happy to help you and your customers with a rock-solid audio stream.
